FIG. 5

R E M A R K S

The outstanding Office Action of April 5, 2006 indicates that claim 1 contains allowable subject matter and that with amendment claim 1 would be allowed. The application has been amended in response to the Examiner's comments and is now believed to be in condition for allowance.

Applicant has amended the language and format for the Abstract and the specification in response to Examiner Kaplan's suggestions.

Attached is an ABSTRACT OF THE INVENTION marked to show changes, a BACKGROUND OF THE INVENTION marked to show changes, a SUMMARY OF THE INVENTION marked to show changes, together with a DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT marked to show changes.

ATTACHED ARE THE FOLLOWING CLEAN COPIES OF THE SPECIFICATION

ABSTRACT OF THE INVENTION

BACKGROUND OF THE INVENTION

SUMMARY OF THE INVENTION

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

Also attached is an amended Claim 1 which has been provided with the proper status identifier.

IN THE DRAWINGS

**Attached is an ANNOTATED MARKED-UP DRAWING of FIG. 5;
also ATTACHED IS A REPLACEMENT SHEET of FIG. 5**

Paragraph 4 of the Office Action indicates that reference character 26 in Figure 1 is not mentioned in the description. The Examiner is requested to reexamine page 16 starting with line 11 and page 17 starting with line 16 as originally submitted. In addition, page 23 starting with line 9 of the amended specification refers to "generator detector 26".

The disclosure is objected to under 37 CFR 1.71 (a). Specifically, Figure 1 does not show an interface or connection between surge suppressors 32, 34 and 36, and power control stage 18. Applicant states this may be so but makes no claim to this embodiment.

The power supply stage 12 includes the switching arrangement and power supply 19.

The specification has been amended to clarify that the surge suppressor 132 as shown in FIG. 5 includes the utility surge protector 34 and generator surge protector 36 shown in FIG. 1. An examination of and comparison of lines L1A, L2A, NA and L1B, L2B, NB in FIGS 1 and 5 illustrate this relationship.

References to the high voltage interface 134 has been deleted from the specification and FIG. 5.

In view of the amendments contained herein and the discussion in support thereof, allowance of this application is respectfully requested.

Notwithstanding, in the event that this response does not completely and fully address the matters and issues set forth in the outstanding Office Action, Examiner Kaplan is invited to contact Applicant's attorney by telephone in order to expeditiously conclude this prosecution.

Respectfully submitted,

ARTHUR W. FISHER, III
